

**Aymroo**  
INNOVATE | CREATE | CONNECTProducts

OVERVIEW

**Aymroo has been manufacturing PVC plumbing fittings for the commercial and domestic markets for over 20 years. From standard fabricated and moulded products to seemingly impossible one-off solutions, we've got it covered.**

**W**hen Colin Leaves started Aymroo in 1989, he brought 40 years of plumbing experience and PVC knowledge to the new business. Today, Aymroo remains Australian-owned and continues to be a pioneer in the field of large bore plumbing fittings.

**Aymroo are innovators, not imitators**

Since beginning operation, Aymroo has been a key player in introducing new plumbing fittings such as the PVC Maintenance Shaft System and plastic-encapsulated Step Irons to the Australian market.

New and improved products that better meet market needs are continually in development. In fact, it was in response to customer suggestions that we decided to extend our range of fabricated fittings to include higher-quality moulded fittings.

### **Quality and standards certified**

Aymroo produces quality moulded and fabricated DWV and Stormwater fittings for plumbers, their merchants and the water authorities of Australia to the AS/NZS1260 and AS/NZS1254 standards under the control of ISO 9001 Quality Management System. Our Drain, Waste and Vent (DWV) fittings and Maintenance Shafts are certified to the applicable Australian standard.

### **Most comprehensive range and stock**

Knowing that plumbers often require a fitting yesterday, and understanding as we do the costs involved with on-site delays, we carry much of our extensive range of standard products in stock for immediate despatch through our nationwide warehouse network.

### **If you can imagine it, we can make it**

We've lost count of the times someone has searched high and low for a fitting that no other business will attempt to manufacture, only to find that Aymroo can make it in a matter of days. It is this flexibility that has made us the first point of contact for many customers looking for a particular product.

## We turn corners

Aymroo produces large bore DWV and Stormwater fittings for plumbers, their merchants and the water authorities of Australia. As an ISO 9001 Quality Management System accredited and AS/NZS standards certified company, the quality of our products is always guaranteed.

### DWV FITTINGS

Aymroo supplies an extensive range of both moulded and fabricated DWV fittings to suit all your specialised large diameter PVC plumbing needs.

Aymroo's Australian made large diameter moulded DWV fittings are moulded in state-of-the-art injection moulding machines using the latest best environmental practice BEP-uPVC technology resins, in Cloud Grey to SN6 AS/NZS1260 for use on SN4 up to SN16 pipe.

Fabricated DWV Fittings are manufactured to AS/NZS1260, triple welded for strength and fibreglassed from socket to socket for strength and durability. A top gelcoat layer is added to encase the fibreglass for strength, a smooth finish and safer handling.

The DWV range includes:

- Bends
- Lobster Bends
- Junctions
- Boss Connectors
- End Caps
- Access Caps
- Bolted Trap Screws
- Reflux Valves
- Inspection Opening (IO)
- Clamp On Inspection Opening
- Level Invert
- Tapers (LIT)
- Couplings
- Access Chamber Couplings
- Boundary Traps
- Drop Junctions
- Drop Bends
- Offsets
- Flanges (Undrilled)
- Vent Cowl

## The quality of our products is always guaranteed.

### STORMWATER FITTINGS

Aymroo supplies an extensive range of both moulded and fabricated stormwater fittings to suit your specialised large diameter PVC plumbing needs.

Aymroo's Australian made large diameter moulded fittings are moulded in state-of-the-art injection moulding machines using the latest best environmental practice BEP-uPVC technology resins, to the requirements of AS/NZS1254 in Storm White colour.

Fabricated stormwater fittings are manufactured to AS/NZS1254, welded for strength and fibreglassed for durability. A top gelcoat layer is added to encase the fibreglass for strength, a smooth finish and safer handling.

The stormwater range includes:

- Elbows
- Junctions
- Boss Connectors
- End Caps
- Flap Valves
- Inline Flap Valves
- Down Pipe Adaptors
- Level Invert
- Tapers (LIT)
- Couplings
- Slip Couplings
- Slap Repair Couplings
- Kerb Adaptors
- Safe Trays
- Flanges
- Safe Waste Trays

## MAINTENANCE SHAFT SYSTEM

Aymroo PVC Maintenance Shafts can replace traditional manholes, where approved, for cheaper and easier sewer system installs. Aymroo has supplied over 50,000 to date, saving thousands of hours for installers and thousands of dollars for project managers.

The Maintenance Shaft System is manufactured to the requirements of AS/NZS4999, plus it has been appraised by the Water Services Association of Australia (WSAA Product Appraisal 02/10) and is recommended as an alternative to manholes by its members and associates. All major water boards have also approved the system.

Quality is guaranteed with Australian Certification Services C-mark certificate #3001. Our system is suitable and recommended for installations across Australia.

## SPECIAL FABRICATIONS

At Aymroo we pride ourselves on being able to fabricate one-off custom fittings, from simple Down Pipe Adaptors to complex Junctions.

If you have an idea or a problem that standard products cannot solve, give Aymroo a call. We will do our very best to create a fitting that perfectly suits your needs.

## STEP IRONS

Aymroo Step Irons are made from high-strength steel bar and are fully encapsulated in tough yellow polypropylene for visibility underground. They are resistant to corrosion from acids and other chemicals present in sewer systems and have been strength-tested to comply with AS/NZS1657:1992.

Step Irons are available in the following sizes:

- 175mm
- 225mm
- 283mm
- 375mm
- 400mm

Pre cast inserts are also available.
